Documentation for a Snow Study in a National Forest in Idaho

Description
Documentation for a snow study by Lyle Watts in a national forest in Idaho. Back of the photo reads, "4/20/31 - 2 PM - Verichrome Stop 16 Time 1/25 - Bright Sun Same as #7." #7is a numbering system Mr. Watts used on some of his photos. This is nearly the same as photo 2009-2936. The sticks in the center of the two places where the snow has melted may be yardsticks or something similar to show the amount of melting that had taken place.
