TARGET Berlin

This map is a photographic view of the world with the center at Berlin. Thus, with the detachable scale, distances can be measured along any line running thru Berlin. It should be noted that an inch at the center represents less mileage than an inch closer to the edges. The detachable scale has been designed to compensate for this and should be used only with the center on Berlin.

The photographic process used in making this map makes all distances measured with the tape approximate only. Distances are shown in statute miles. Lines between key cities do not represent regular air routes in all cases. They show distances between points that do not fall on a line going thru the center of the projection.
